Profile Summary

Result-oriented Data Analytics professional with over two years of experience driving data-driven growth in B2B environments. Expert at architecting end-to-end ETL pipelines (Python, PySpark, VBA) and automating data workflows and power real-time Tableau dashboards, boosting conversion accuracy by 30% and CTR by 30% QoQ. Proficient in SQL, R, TensorFlow, PyTorch, with a proven track record of leading teams in advanced market segmentation, statistical analysis, and predictive modeling. Adept at collaborating with sales and product stakeholders to translate complex datasets into targeted strategies, securing high-value deals and achieving a 15% lift in conversions.

Skills

Languages: Python, VBA (Visual Basic for Applications), SQL, R-Basic

Database: MySQL, NoSQL | **Cloud Platforms:** Amazon Web Services (AWS)

Tools & Technologies: Data Science, Data Analysis, Tableau, Power BI, Docker, GIT, Linux, Microsoft Office, Microsoft Excel, Outlook, Jira, Metasploit, Seamless AI, Advanced Zoominfo, Sales Navigator, Hunter IO.

Machine Learning & Deep Learning Frameworks/Libraries: TensorFlow, PyTorch, Scikit-learn, XGBoost, Random Forest, RNN, ANN, CNN, NLTK, OpenAI APIs, OpenCV, NumPy, Pandas

Certifications: Core and Advanced Python Programming, Data Analysis and Visualization with Tableau, Data Analysis and Visualization using Excel, SQL For Data Science.

Experience

Agile Enterprise Solutions Inc. (Equinox Consulting Pvt. Ltd) Hyderabad, India 08/2024 – Present

Business Development Executive / Lead Research Analyst

- **Led Advanced Market Segmentation Analysis:** Supervised a team of five data researchers to design and execute segmentation models that identified high-value prospects, boosting targeted outreach by 35%.
- **Built Automated Email Analytics Engine:** Architected a VBA-driven SMTP automation platform with integrated click-through tracking and server health diagnostics, cutting manual processes by 35% and lifting CTR by 30% QoQ.
- **Managed Data Ingestion & Dispatch Pipelines:** Oversaw daily operation (7–8 hours) of outreach servers, automating data capture, email dispatch, and performance logging to ensure reliable, scalable workflows.
- **Developed ETL Workflows for Real-Time Dashboards:** Engineered and maintained Python and VBA ETL scripts to feed Tableau dashboards with weekly data, improving conversion accuracy by 30%.
- **Translated Insights into Growth Strategies:** Collaborated with sales and product stakeholders to turn dashboard metrics and segmentation results into targeted campaigns, driving a 15% increase in conversion rates.

Talent Logic Inc. Hyderabad, India 10/2023 – 08/2024

Senior Research Analyst

- **Engineered Python-Powered ETL Pipelines:** Built and maintained automated research workflows to extract, transform, and load data from LinkedIn, Indeed, Glassdoor, and ZoomInfo, yielding 15,000+ validated company–contact pairs each month.
- **Developed VBA Macros for Data Quality:** Created and optimized Excel VBA scripts to validate and enrich email addresses, improving outreach accuracy by **35%.**
- **Performed Campaign Performance Analysis:** Designed and executed data-driven email strategies, analyzing engagement metrics to secure an $80K deal with Kardex and Dean Dorton.

Petabytz Technologies Pvt Ltd Hyderabad, India 02/2023 – 10/2023

Research Analyst

- **Built Director-Level CRM Dashboards:** Analyzed Fresh-works CRM dashboards for strategic planning
- **Standardized KPI Reporting:** Standardized KPIs and reporting to align marketing and sales.

Projects

ASITEM (ARCHITECTURAL SKETCH IMAGE TO 3D MODEL) 07/2018 - 12/2022

- Developed an end-to-end deep learning model that **combines CNN and VGG-16 architecture models** to transform architectural sketches into precise 3D reconstructed models.

Education

Bachelor of Technology (B.Tech) – *Amrita Vishwa Vidyapeetham* – Electronics 07/2018 - 12/2022
